PROFILES

Each student, faculty, or staff person in the Department will receive a profile on the Department website.

This profile is used by faculty to search for teaching assistants, and other positions. Update your profile with links to your class projects, as well as links to your personal portfolio website.

To edit the profile, users log in using the login button at the top right.
The African Urban Metabolism Network (AUM Network) was founded by the Urban Metabolism Group at MIT and researchers at Stellenbosch University in Cape Town, South Africa.

JOHN FERNANDEZ, PHEBE DUDEK, JOSEPHINE MUSANGO, PAUL CURRIE

Olivia was born and educated in New Jersey. She received her Bachelor of Arts in Architecture at Princeton University where she wrote a thesis about tiny Japanese houses. Feeling there was no longer anything “new” about her home state, she escaped to MIT. Besides architecture, she adores dancing, snowboarding, and colors, particularly purple.

Enas is an M. Arch student from Saudi Arabia. She received her BSA from MIT in 2012. During her five years at SA+P, she has been involved in different parts of architectural education, including design, building technology, history and theory, and fabrication, among others. Over the last few years, she has worked with some influential and creative professionals in the architectural and engineering industry, both in and out of the institute. She spent summers 2010 and 2011 as an intern at SOM in Chicago, and summer 2014 at KMD in San Francisco. During the academic year, she has conducted research work with several professors at MIT, including Professor William O’Brien Jr., Professor Brandon Clifford, Professor Nasser Rabbat and Professor James Wescott.

PROJECTS

To create a project, either for yourself or for your group, click “Project” in the drop down, from the plus sign.

Anyone can make a project. The project will *not be automatically attached* to any profile or subject. You will need to add them.

In order to create a project, you will need a title, an abstract and at least one image. That’s it!
PROJECT
Emergency Preparedness Hub

Currently at Market Street Prototyping Festival, San Francisco
April 9 - 11th, 2015

The first 72-hours after a disaster are the most critical in survival and recovery. The Emergency Preparedness Hub is part of a public space campaign for neighborhood preparedness that facilitates community action following a disaster such as an earthquake. Entirely off-grid, the hub is built around the short-term and immediate need for water, energy and communication. Using strategically placed physical units, various neighborhood groups can actively engage in discussions and exercises to build awareness and preparedness into their everyday life. The Urban Risk Lab will work with each community which adopts the idea to design a permanent public infrastructure for their neighborhood.
